

1. CVI/AHD video interference (amplified) Basic Profile This video is a kind of interference in a common video transmission without repeaters farthest 800M video signal transmission electronics products. Widely to solve various frequency, common mode, textured and other interference, and has lightning protection, anti-static function, this product is the power type of anti-jamming device.

2. the transmission distance CVI/AHD's immunity Due to differences in the characteristics of the cable manufacturers, so different manufacturers of this product in the cable transmission distance will vary, specific transmission distance Refer to the following table :(Note: these cables to GB standard cable sample test results different manufacturers of different transmission distance)

Video Coaxial Cable Distance	
Coaxial cable	Maximum distance (meters)
SYV75-3 =RG58	500M
SYV75-5 real core=RG6	750M

Remarks: this cable for DC 12V Power, working current $\leq 300\text{mA}$
CVI/AHD模拟高清抗干扰器连接示意
